Countries

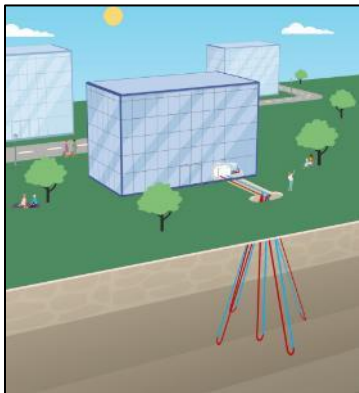

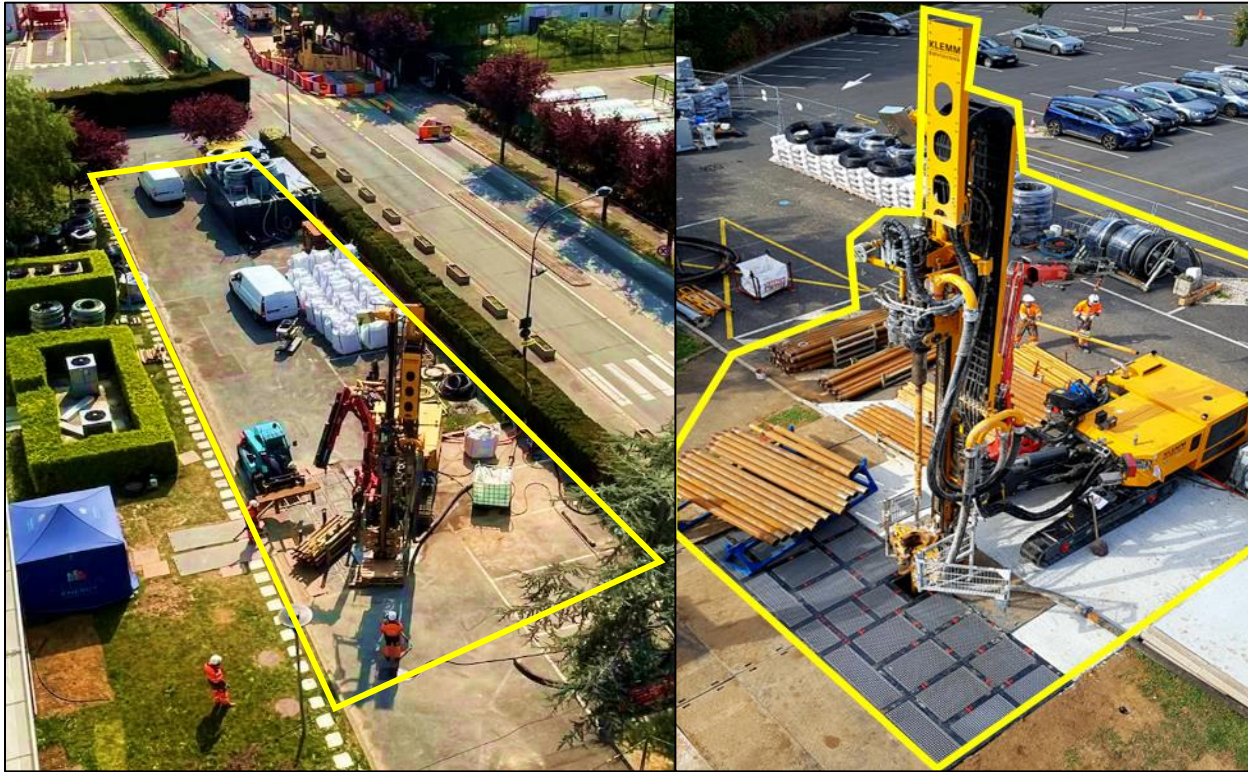

\$28B+
Revenue

World leading technology provider for energy industry, driving innovation for a balanced planet

Flexibility by Design

Small
Footprint

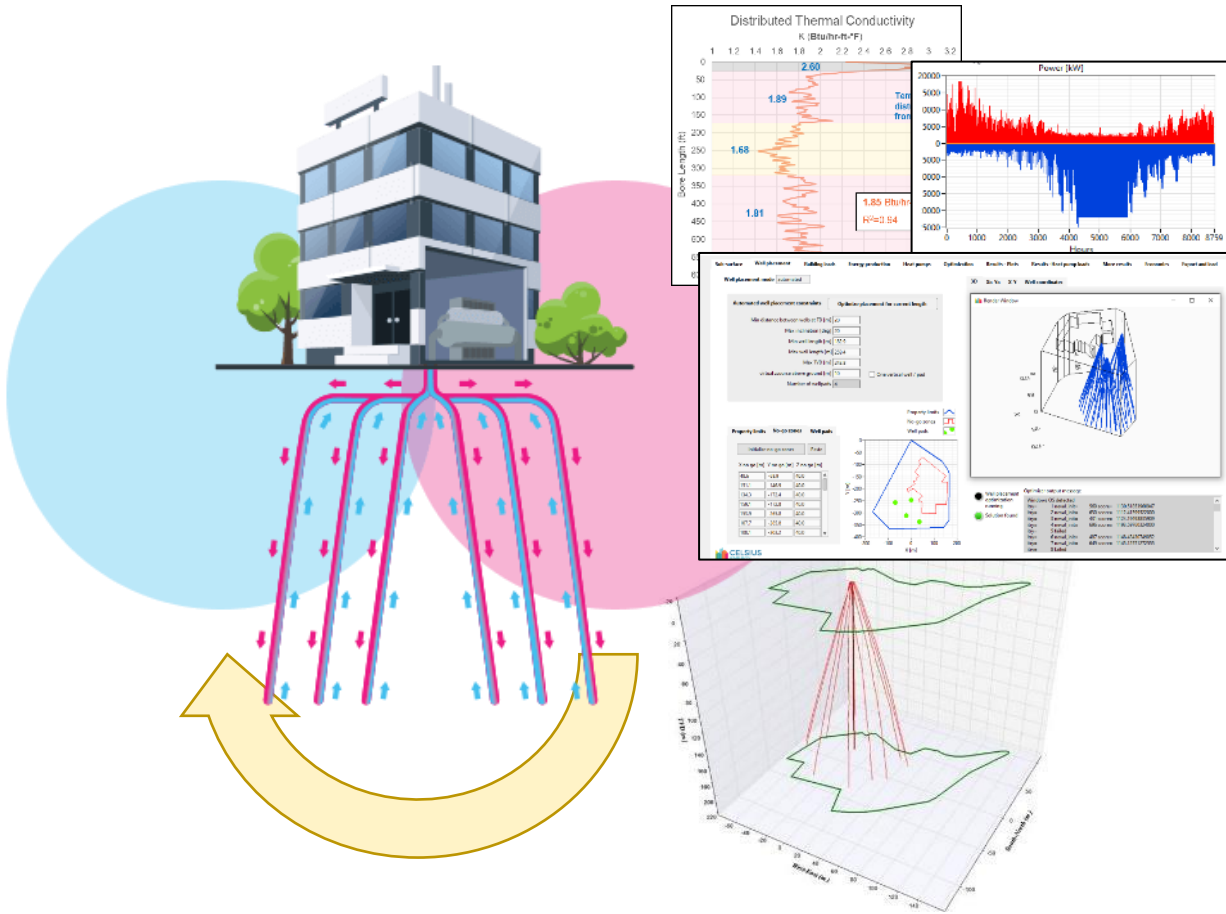

90% reduction in site impact
Eases Utility Setback
Preserves Real Estate
Flexible Construction Planning

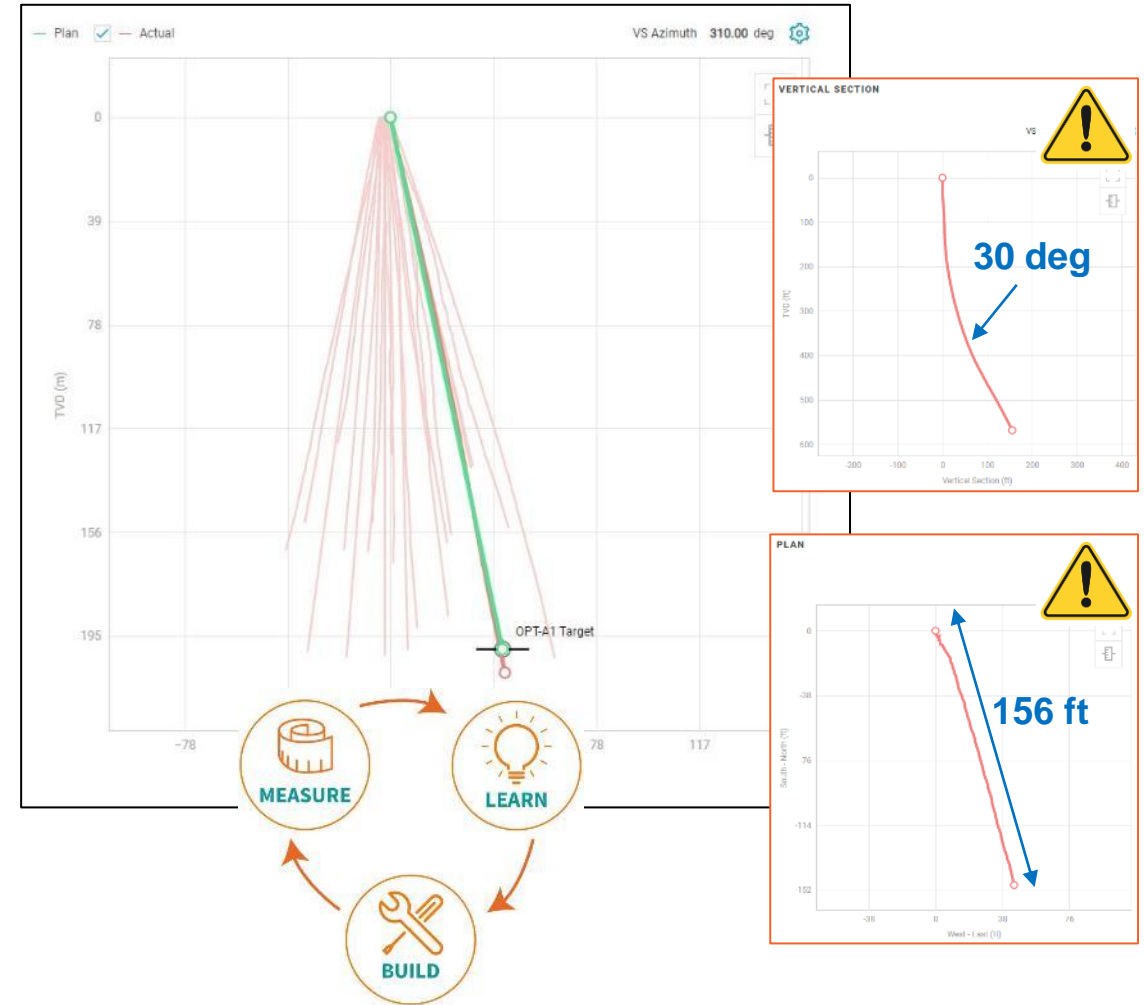

Cost-
Effective

30% less bores
70% less surface piping
Increased thermal capacity
Individual bore isolation

Performance Validation

Holistic ground to building model - total system design
Single point of performance accountability
As-built verification & digital twin

Eliminate “under-build” & “over-build”
Eliminate bore collision
Observe property boundaries

[illegible]
